CAMERAS INFORM YOUR TRUCK'S SURROUNDINGS

Equipped with rear-view and passenger side-view cameras, operators value the enhanced visibility of the truck's perimeter. This reduces blind spots to improve safety when conducting tight maneuvers and operating in congested worksites.

DIG FASTER |

THE RECIRCULATION PORT IS A REAL EFFICIENCY GAIN

The recirculation port prevents water loss during pump priming and more importantly, offers operators the ability to heat the water tank at anytime. The dual-purpose feature boosts efficiency through cold-weather readiness.

| DIG SMARTER

A SMALLER PUMP DIGS LONGER?!

Efficiency over power. Our smaller 10.5 GPM pump draws water from the F2 tank, to the dig wand, at a slower flow rate. This enables operators to dig even longer, despite the F2 possessing a smaller tank for optimized maneuverability.

DIG BETTER |

AGILE & MANEUVERABLE IN THE TIGHTEST URBAN CORRIDORS

Above all else, the F2 Urban was designed to ease navigation within constrained work sites, commonly found within city centers. Favouring agility & maneuverability over hauling capacity, the F2 is an ideal digging solution for the downtown core.
